

System I-Color

● Installation

Insert the USB key (or dongle) in your computer, go to its root directory and run the program IColor8.exe.

Allow the program to run if the system asks you.

Follow the installation wizard

- Select your language
- Accept the terms of the license agreement
- Select the folder where I-COLOR SYSTEM will be installed
- Select the folder where the user data will be stored (working directory)
- Select the components to be installed
- Select the shortcuts to I-COLOR SYSTEM of your choice (Desktop and Start Menu)
- Review your selections, confirm the installation and wait for the program to be installed and then close the installation program

You can now run I-COLOR SYSTEM

● Activation (For non-dongle versions only)

The software automatically activates the first time it is run if you have an Internet connection that allows this.

If not, manually activate the software by following the instructions on the screen.

● Start up

Run I-COLOR SYSTEM 8 via the Desktop or Start menu shortcut.

Default user details :

● Informations

Help is available on the USB key (or dongle).

Warning for USB dongle option: The dongle must remain connected during the use of the software.
